

DISCRETE MATHEMATICS IN CHINA

CONTENTS

Preface	1
<i>W. Chu and L.C. Hsu</i> On some classes of inverse series relations and their applications	3
<i>Z. Dai, X. Feng, M. Liu and Z. Wan</i> Nonlinear feedforward sequences of m -sequences I	17
<i>F. Dong and Y. Liu</i> Counting rooted near-triangulations on the sphere	35
<i>Z. Gao</i> The number of degree restricted maps on general surfaces	47
<i>Y. Hong</i> Bounds of eigenvalues of graphs	65
<i>Q. Li and J. Shao</i> The index set problem for Boolean (or nonnegative) matrices	75
<i>Y. Liu</i> On functional equations arising from map enumerations	93
<i>F. Shi and W. Li</i> The density of a maximum minimal cut in the subset lattice of a finite set is almost one	111
<i>S.-T. Ting and S.-Y. Zhao</i> The general Steiner problem in rectangular crisscross space	117
<i>G.-Z. Tu</i> A combinatorial formula relating to Hirota's bilinear equations	121
<i>Z. Wan</i> Anzahl theorems in finite singular symplectic, unitary and orthogonal geometries	131
<i>W.-D. Wei, S. Gao and B. Yang</i> Cyclic near difference sets of type 1	151
<i>W.-D. Wei and J.-Y. Xu</i> Cycle index of direct product of permutation groups and number of equivalence classes of subsets of Z_v	179
<i>L. Zhu</i> Some recent developments on BIBDs and related designs	189
Author index to volume 123	215
